Oil claws back some losses after crashing on Supply-Demand shock. Oil clawed back some losses after its biggest drop in three decades as investors grappled with simultaneous supply and demand shocks and the most volatile market on record. Futures in New York rose more than 7% after losing a quarter of their value Monday in the biggest plunge since the 1991 Gulf War. A gauge of volatility in the contract jumped to the highest in data going back to 2007 as the collapse of the OPEC+ alliance set off what could be a long and bitter price war. (*Bloomberg*)

ADB: Vietnam to lose 0.41% of GDP due to COVID-19. Vietnam is forecast to lose some 0.41% of GDP due to the novel coronavirus (COVID-19) outbreak, according to the latest report by the Asian Development Bank (ADB). Under ADB's report titled "The Economic Impact of the COVID-19 Outbreak on Developing Asia" released late last week, Vietnam's damage was much better than that of other Asian economies, ranking ninth after Taipei (0.44%), Singapore (0.57%), Mongolia (0.74%), mainland China (0.76%), Hong Kong (0.85%), Thailand (1.11%), Cambodia (1.59%) and the Maldives (2.05%). According to ADB, there are several channels through which the COVID-19 outbreak will affect economic activity in developing Asia and the world. These include a sharp but temporary decline in domestic consumption in China and other outbreak-affected economies, and possibly investment if the outbreak affects views on future business activity; declines in tourism and business travel; spillovers of weaker demand to other sectors and economies through trade and production linkages; supply-side disruptions to production and trade (which are distinct from demand-side shocks spilling over through trade and production linkages); and effects on health such as increased disease and mortality as well as shifts in healthcare spending. Each of these is taken in turn. ADB says developing members that will be significantly affected are those with strong trade and production linkages with mainland China. In addition to tourism-dependent economies, other developing Asian economies such as Hong Kong (China), Mongolia, the Philippines, Singapore, Taipei (China) and Vietnam will be materially affected by the COVID-19 outbreak. Many of these economies see a significant share of tourists from mainland China and are affected through that channel as well. "The magnitude of the economic losses will depend on how the outbreak evolves, which remains highly uncertain. The range of scenarios explored in the analysis suggests a global impact in the range of US\$77bn to US\$347bn, or 0.1% to 0.4% of global gross domestic product (GDP)," ADB said in the report. In a moderate scenario, where precautionary behaviours and restrictions such as travel bans start easing three months after the outbreak intensified and restrictions were imposed in late January, global losses could reach US\$156bn, or 0.2% of global GDP. Mainland China would account for US\$103bn of those losses – or 0.8% of its GDP. The rest of developing Asia would lose US\$22bn, or 0.2% of its GDP. (*Vietnamnet.vn*)
