Market commentary: The VN-INDEX extended gains despite strong net-selling by foreigners.

Vietnam's stock market witnessed divergence with the VN-INDEX gaining another 6.0pts while the HNX-INDEX slightly declining by 0.2%. The VN-INDEX opened in the red, following the sharp fall in Asian stock markets as investors remained cautious while waiting for countermeasures planned by China after the escalation of the US-China trade war last week. However, the bottom-fishing activities soon built up and dominated in many blue-chips, thus supporting the index to regain early lost ground. Specifically, VNM was today's largest supporter of the index and surged by 2.9%, alone adding 2.0pts to the index's gain. Other market propellers from Financials and Real Estate sectors also recorded gains, including VHM (+1.2%), BID (2.2%), BVH (+3.8%) and VRE (+1.8%). On the other hand, some notable stocks suffered losses today, including GAS (-1.2%), HPG (-2.4%) and MSN (-0.9%). However, these laggards were far surpassed by the other bullish large caps. As a result, the VN-INDEX rose by 0.6% to close at its intraday peak of 958.5pts. On another note, the HNX-INDEX gradually lost steam throughout the trading session and ended at 105.6pts (-0.2%) amid strong decline of large caps such as DGC (-2.2%), PVS (-0.9%) and VCG (-1.5%).

IT (+1.2%), Consumer Staples (+1.1%) and Financials (+0.9%) rose while Materials (-1.3%), Energy (-0.7%) and Healthcare (-0.4%) dropped. Top index movers included VNM (+2.9%), VHM (+1.2%), BID (+2.2%), BVH (+3.8%) and POW (+4.8%). Top index laggards consisted of GAS (-1.2%), HPG (-2.4%), MSN (-0.9%), PLX (-0.8%) and EIB (-2.7%). Top three major block trades were HNG with 69.7m shares (VND972.3bn), VGC with 12.5m shares (VND249.1bn) and VSH with 10.0m shares (VND190.3bn).

Foreigners net sold on HOSE, to the amount of VND111.3bn, and also net sold on HNX, to the amount of VND290.1bn. They mainly bought TCB (VND173.8bn), VNM (VND119.3bn) and BVH (VND63.0bn); and mainly sold VGC (VND253.3bn), TCB (VND173.8bn) and VNM (VND92.9bn).

Oil was caught between the specter of a full-blown U.S.-China trade war damping demand and a supply backdrop ripe with potential risks. Futures in New York were steady after swinging between an 0.7% loss and a 0.3% gain. U.S. officials are expected to release details of additional tariffs of 25% on all remaining Chinese imports Monday. That came after Beijing vowed retaliation for Washington raising levies on US\$200bn of Chinese goods Friday. Meanwhile, an outage at a field in the Norwegian North Sea and a drop in U.S. working rigs are among a host of factors keeping supply tight. After posing the biggest quarterly gain in almost a decade, oil has been losing ground since late last month. Signs that Saudi Arabia would pump more to make up for lost Iranian barrels and the deteriorating U.S.-China relations are the main reasons, and have spurred more bearish bets on West Texas Intermediate crude. Still, rising tension between Washington and Tehran and the likelihood of Venezuelan output falling further are supporting prices, with Brent rising for a fourth day on Monday. (*Bloomberg*)

Mega-projects could push Vietnam's FDI to new level. With a series of billion-dollar foreigninvested projects in the pipeline, Vietnam is expected to attain a new record in foreign direct investment attraction this year. According to the southern province of Binh Duong's Department of Planning and Investment, a textile and garment project from Hong Kong's Wai Chi Kai Knitting Company will soon be licensed, and could be the first billion-dollar project of 2019. Located in Dong An 2 Industrial Park, the Weijia Textiles Vina venture aims to benefit from huge export opportunities given by the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP). Other potential billion-dollar projects include the US\$4.3bn US-backed Energy Capital-invested gas-to-power project in the southern province of Bac Lieu, and the long-awaited US\$4.6bn ExxonMobil initiative in the central province of Quang Nam. Up to now, the Bac Lieu People's Committee has been urging the Ministry of Industry and Trade to fast-track the appraisal process in order to add the gas-to-power project to Vietnam's Power Development Master Plan VII, finish funding procedures, and then grant an investment certificate to the foreign investor. In addition to these three mammoth projects, other major plans are finalising procedures to be licensed this year. They include the US\$500m project of South Korean-invested Hana Micron, which in mid-April signed a co-operation agreement with the Bac Giang Industrial Zones Management Authority in the northern province of Bac Giang to develop a hi-tech and semiconductor device factory. Apparel Far Eastern is seeking to increase an additional US\$610m in its existing production, while Meiko Electronics is to add US\$200m to Vietnam-based facility. Elsewhere, CP Foods of Thai billionaire Dhanin Chearavanont, is planning to invest US\$200m in a pork and domestic fowls centre in Vietnam. If these huge projects are licensed this year, it is possible that Vietnam can break the 2018 figure of US\$35.46bn of newly-licensed projects, added foreign direct investment (FDI), and stake acquisitions. In the first four months of 2019 the figure reached US\$14.59bn, up 81% yoy and reaching a four-year record high. The investments have been said to take advantage of the CPTPP and to ease risks from the ongoing US-China trade tensions. LG Electronics has announced that it will halt smartphone production in South Korea, putting the future of the second-tier smartphone brand in question amid a shrinking market share and heated competition from Chinese companies. It plans to move its high-end smartphone production from a plant in Pyeongtaek, on the outskirts of Seoul, to a factory in Vietnam's northern city of Haiphong. With the move, LG is developing its Vietnamese operations into a global production hub in a similar fashion to electronics giant Samsung. Similarly, leading Taiwanese computer maker Compal Group plans to expand its production capacity in Vietnam to raise the group's exports to US\$1.5bn-US\$2bn per year, according to Ray Chen, the group's vice president. 1Q19 earnings recap - A weak quarterly results season but not as bad as feared

A weak quarterly results season but not as bad as feared. Corporates' aggregate net profit grew a slim 0.8% yoy on the back of net sale growth of 3.7% yoy, much lower than results seen in 1Q18 (NP and revenue jumped 19.1% yoy and 31.7% yoy, respectively). We observed that corporates' earnings growth is trailing behind the country's nominal GDP growth, which both marked a deceleration since 2Q18. Under our coverage, 40% posted 1Q19 results were in line with our expectations, while 36% were above our forecasts and the remaining 24% were well short of our expectations.

Flattish earnings growth due to the slowdown of banking and the weakness of real estate. RE had a lacklustre start with a dive of 3% yoy in bottom line (vs. +66% yoy in 1Q18) as a result of weak deliveries from most property developers. Meanwhile, banking, one of market's largest contributor on market cap-weighted basis, posted a lukewarm 1Q19 results with net profit growth of 12% yoy, much lower than the growth of 56% yoy in same period last year.

Consumer-related sectors took centre-stage in 1Q19. Consumer-related sectors were the key drivers to market earnings growth. Retail earnings grew 25% yoy on the back of network expansion and FMCG recovery as top producers (VNM, SAB, QNS, MCH) posted favorable results after a few sluggish past quarters. Automobiles exhibited a good performance thanks to impressive sale volume growth (10 times yoy) after car import procedures were cleared since 2H18.

Not yet time for bottom-fishing. VNINDEX increased by 6.1% YTD; market trailing P/E came at 16.4x as of 9th May 2019, nearly the same levels seen in Jul 2018. However, trailing-twelve-month (TTM) earnings grew 11.0% yoy by end-Mar FY19, deeply lower than the 26.3% TTM earnings growth by end-Jun FY18, thus, making VN-Index not very attractive, in our view. We still see some potential names for long-term horizon trading. Retailers (MWG, PNJ) still experienced solid growth on the back of network expansion and high consumer confidence index. A few property developers (NLG, VHM) might get back to the centre stage as high-rise projects will be launched for sale in 2H19F after a long time pending due to license approval delay.

Vincom Retail Joint Stock Company (VRE VN) - Non-rated note - NON-RATED

Gear up for the retail boom

VRE solidified its position as the leading retail real estate developer in Vietnam with 66 shopping malls across 38/63 provinces as of end 1Q19. Comparing to 1Q18, total gross floor area (GFA) has expanded by 23.4% yoy, built on 45 Vincom Plazas (accounting for 52% of total GFA), 3 Mega Malls (27%), 6 Vincom Centers (17%) and 12 Vincom+ (4%).

VRE scheduled 13 mall openings in 2019. Three new shopping malls will be opened in 2Q19 and other 10 malls will be launched in 2H19, adding a further ~153,000 sqm to its total leasing capacity. In April, 2 malls were opened in Hanoi, including Vincom Plaza Skylake and Vincom Center Tran Duy Hung. The malls are located in prime, high-density locations and already secured over 90% occupancy rate. VRE will speed up in 2020 to reach its target of launching 40 malls and bringing total GFA to around 2m sqm during the period FY2019-20F.

Vincom+ model adopts new design. Vincom+ is the latest mall format of VRE, which is located in non-CBD areas to target mass population consumers. VRE is now reviewing the design of Vincom+ from one-floor, no basement to one basement and one leasing floor. The new design will offer more leasing options to tenants and will allow for smooth upgrade in the future to higher-class Vincom Plaza without disrupting the existing businesses inside the Vincom+ malls. The mall upgrade would accommodate the rising demand of higher-quality modern shopping in 2nd tier cities and provinces.

Leverage from Vingroup's (VIC VN) ecosystem. For the period FY2020-21F, VRE would continue to set up 3 Vincom Mega Malls inside Vinhomes' (VHM VN) mega projects (Vinhomes Ocean Park, Vinhomes Smart City, Vinhomes Grand Park), adding 160,000- 200,000 sqm of GFA. Locating in prime locations within large complexes with immediate catchments from surrounding apartment buildings, villas as well as possible links to other related facilities such as Vinpearl Land and VinUni, these malls will serve as one of key highlights of each project, offering new experience of modern and traditional shopping spaces along with cultural and entertainment areas.

Attract popular brands and chain tenants. Side by side with the expansion of VRE, several existing chain tenants have also expanded its footprint namely CGV, H&M and TiniWorld. While considering new tenants, VRE also favours large-scale and expanding retail chains. VRE has recently welcomed high potential brands such as OVS, HLA and The Body Shop.

Average occupancy rate improved by 1.6% pts yoy in 1Q19 thanks to the continuous upgrade in the tenant mix of existing shopping malls. Specifically, the occupancy rate of Vincom Plaza (accounting for 52% of total GFA) and Vincom Mega Mall (making up 27% total GFA) surged to 92.3% (+0.7% pts) and 90.5% (+1.5% pts) in 1Q19, respectively. Together with ramped up marketing activities, VRE has boosted average footfall (+36% yoy) and drove up average rental rates of Vincom Plaza and Vincom Mega Mall by 9.9% yoy and 10.5% yoy, correspondingly.

Khang Dien House Trading And Investment Joint Stock Company (KDH VN) – Update – HOLD (+13.0%)

A lacklustre start to the year

1Q19 results highlights. We believe the Jamila project was likely the sole topline driver, with about 420 units of blocks A and B to be delivered in this quarter, allowing KDH to record property revenue of VND842bn (+108.6% yoy). This accounted for 28.0% of the company's FY19 revenue guidance. As there were no deliveries of higher-margin villas/townhouses in 1Q19, the gross margin shrank 12.9% pts yoy to 31.4%. 1Q19 selling expense climbed 144.4% yoy, outpacing revenue growth as we believe the commission rates charged for condo distribution are higher than that for landed properties. Consequently, KDH posted a 1Q19 net profit of VND102bn (-3.8% yoy), a mere 11.3% of its FY19 net profit target.

Two new projects to solidify near-term growth. Two new projects, namely Lovera Vista (1,300 condo units) and Venita Park (300 villas/townhouses), will be launched for sale in 2019, while others are in the planning stages, or in progress. We expect these two new projects and the unsold Safira condos launched in late of 2018 to altogether contribute VND3,465bn to KDH's presales (+73.2% yoy). The company is negotiating to fully complete land clearance at the mega Tan Tao township project. If successful, this project will be ready for sale by FY20F, in our view.

Plans to issue VND450bn of straight bonds. In May 2019, KDH announced a private placement of VND450bn straight bonds to Dragon Capital Fund Management (not listed), equivalent to about 60% of its 1Q19 debt outstanding. The coupon rate is 12% per annum and 50% of total issuance value will be bought back after the first 12-month period.

Maintain Hold rating with TP unchanged. We believe the company's two new projects have been largely priced in. However, the kick-off of the mega Tan Tao township project may trigger positive market sentiment on KDH. Over the long run, KDH's land bank in HCMC is still the envy of most of its peers and is a ticket to ride the HCMC housing market, as well as a boon to the company's long-term earnings growth. We retain our Hold rating and target price. Re-rating catalysts include the launch of the Tan Tao project. Higher-than-expected increases in mortgage rate and sudden regulatory changes are now the key downside risks to our call.

| MSH | 58,000 | 62,500 | 6.1% | 13.8% | HOLD | MSH leads position in apparel manufacturing industry, solidified by a strong customer base of global premium fashion brands. A change in product mix with larger contribution from high-margin FOB (Free on Board) apparel production is expected to be the near- term growth driver. | <u>Link</u> |
| MWG | 85,200 | 118,800 | 1.7% | 41.1% | ADD | Mobile World Investment Corporation (MWG) is the largest consumer electronics retailer in term of both revenue and earnings. CE retail business is expected to be a stable short-term growth engine. We see long-term potential in the grocery retail business, underpinned by: 1) high-growth segment to lure both local and foreign retailers; and 2) improving performance of BHX in late-2018. | <u>Link</u> |
